

GRUNDFOS PUMP MANUFACTURING CORPORATION
FRESNO, CALIFORNIA

The Grundfos Pump Manufacturing Corporation, of Fresno, California, is part of the Grundfos group and is among the worlds largest producers of several types of pumps. These include a wide range of commercial and industrial pumps, as well as pumps for individual use. Grundfos Pump Manufacturing also develops, produces and runs its own assembly lines. The pumps created at this facility are used to bring water to a large number of places all over the world and also to help monitor water use at many of these places. The facility is ISO 14001 certified.

AT A GLANCE:

ENVIRONMENTAL PERFORMANCE

Past Accomplishments

Grundfos Pump Manufacturing Corporation has demonstrated its commitment to environmental performance by reducing solid waste and energy use. Since 1997, the facility has:

- **Reduced solid waste** by 55% through increased recycling.
- **Reduced energy use** by 17% by using an employee team to look for ways to reduce energy use facility wide. Some of these included the installation of efficient lighting and occupancy sensors around the facility.

Future Commitments

Grundfos Pump Manufacturing Corporation is working to create an employee team to find ways to reduce chemical use, chemical waste and general waste, as well as further reducing energy use. By 2003, the facility will:

- **Reduce chemical waste** by 43% using an employee team to identify alternatives, improve handling methods to reduce accidents, and find recycling options.
- **Reduce chemical use** by 50% through identifying alternative chemicals and eliminating duplicates used in the process.

- **Reduce energy use** by 7% using an employee team that will find new ways to reduce and update current equipment.
- **Reduce solid waste** by 33% with the help of an employee team that will find alternative ways to eliminate the waste.

COMMUNITY OUTREACH

The Grundfos Pump Manufacturing facility conducts weekly and monthly audits on several sources to maintain awareness on their environmental impact. The facility has also created a pamphlet to give to community members and facility employees on the company policy towards the environment and its current practices. Information on the Annual Performance Report can be found on the Web Site and also in the company Annual Corporate Environmental Report.
